

How to use the ClearSea app to connect to CULS MCU videoconference

ClearSea client is for everyone who can't use the main videoconference units and still want to be participating during the videoconference.

1. Open the web page address: <http://cs.cesnet.cz/download/>
2. Download and install the client which is suitable for your device (available for Windows, Mac, Android and iOS)
3. Run the ClearSea client
4. On the „GUEST USER“ area, fill in the name and the address for CULS MCU connection.
Direct address for the videoconference: czu-mcu-5555@cs.cesnet.cz (Fig. 1)
5. Click on the „Call“ button

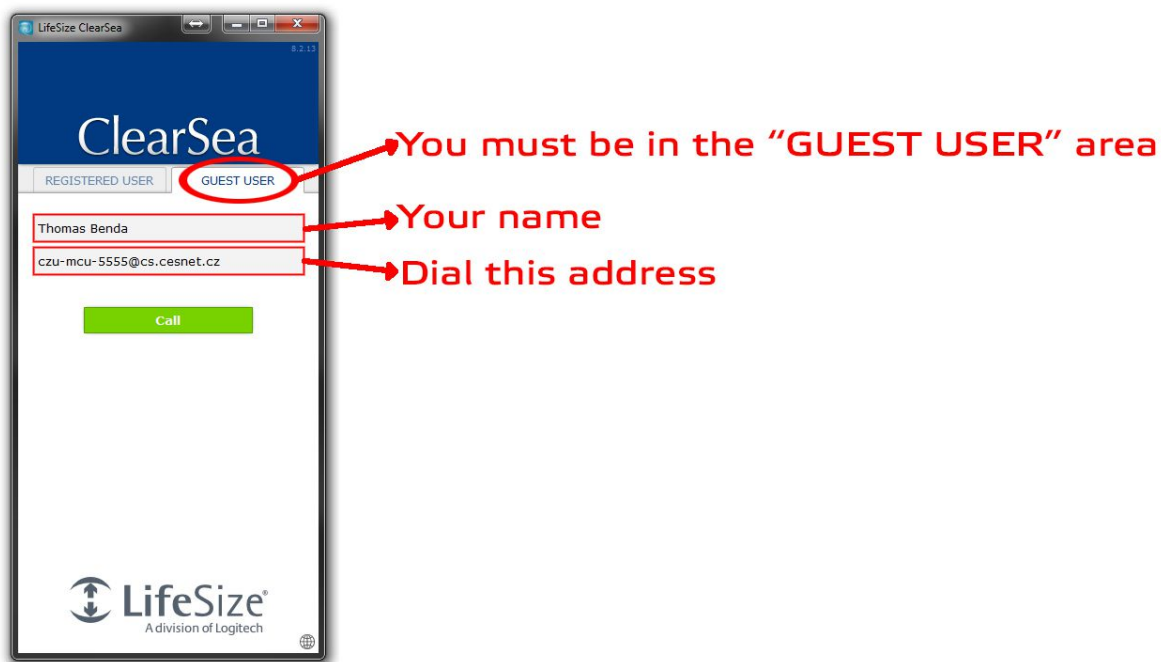

Figure 1 – Connection information

6. Now you are connected to our videoconference room. You can also adjust your videoconference settings (Fig. 2)

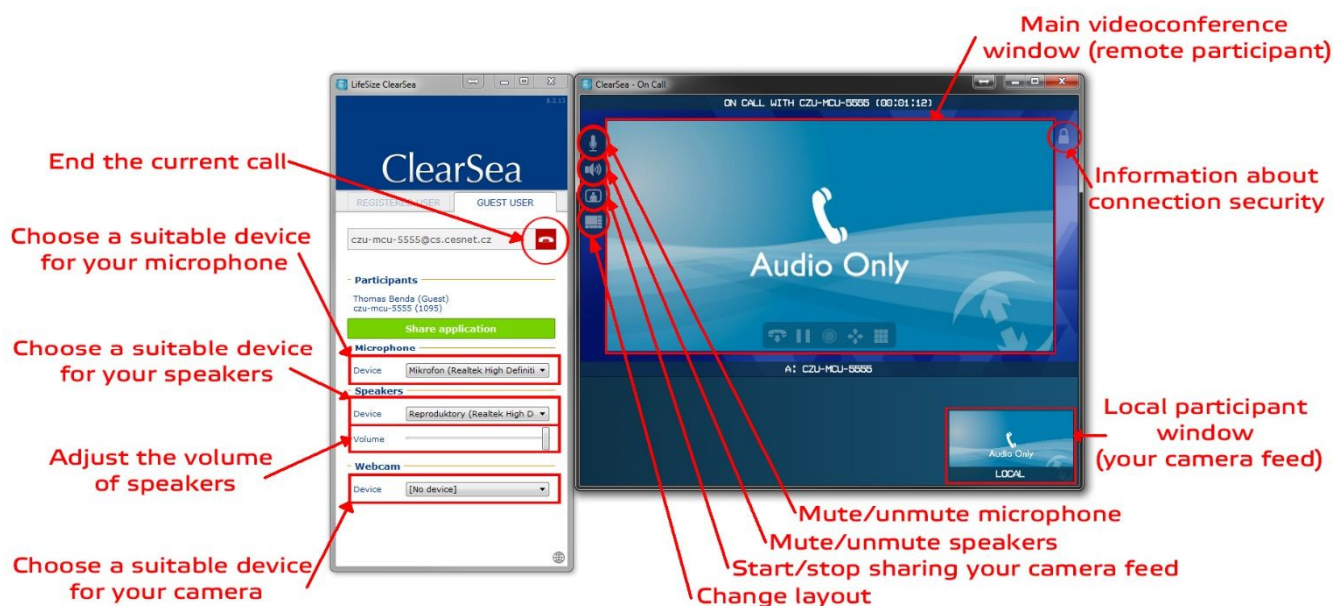

Figure 2 – Settings

Note:

- Described procedure will **work only for CULS MCU videoconferences** (host for the videoconference must be Czech University of Life Sciences Prague)
- Make sure that you are **using best available internet connection**
 - If you have poor connection -> try to switch off the camera during the videoconference (stop sharing camera feed – *figure 2*)
- If you have any troubles to make this work, do not hesitate to contact the AV Support Center at CULS
